

ABSTRACT

A shampoo or body detergent composition which comprises (A) a refrigerant substance selected from menthol, menthone, camphor, 5 pulegol, isopulegol, cineole, Japanese peppermint oil, peppermint oil, spearmint oil, and eucalyptus oil, (B) a substance giving a cool feeling and comprising an N-substituted p-menthane-3-carboxamide derivative, (C) an anionic surfactant, and (D) a water-soluble polymer and/or polyhydric alcohol. It 10 optionally contains (E) a substance which gives a warm feeling. The composition is satisfactory in the effect of giving a refrigerant feeling and cool feeling during use and in the retention of that effect thereafter.
